

# ICT Career Opportunity

VT Solutions is a leading ICT vendor in Fiji, providing technology solutions and services to corporate clients across the nation and the Pacific. We are looking to recruit, retain and develop persons who share our values and are committed to developing their careers by standing out from the crowd with passion for their jobs, service and smarts.

---

## ICT TECHNICIANS – SUVA & NADI

We are looking for enthusiastic, goal driven, mature-minded and committed persons who want to prove themselves in a fast-growing area of our company and make a positive impact with team members and customers, while developing their own careers.

### Key Responsibilities:

- Laying of communication cables
- Termination and testing of cables
- Project stock accountability and management
- Project and job report writing and data entry
- Liaison with project managers and project owners

### Skills and Competencies:

- Structured cabling experience, with passion for technology solutions
- Experience in leading and/or part of work projects and managing teams
- Highly organized, with strong work ethic
- Written and verbal skills meet business communication standards
- Honest and committed to work with integrity

### Minimum Qualifications & Certifications

- Diploma in Information Systems or Electronics
- Structured cabling certification
- Clean and valid driver's license
- Fiji citizen or permanent resident

***We also invite expressions of interest from tertiary students studying Electronics or similar who are keen to undertake up to 6-months Work Experience Training Attachment in our Security Systems & Communications division. They will be based either in Suva or Nadi. We will select candidates who exhibit and share our values.***
